Please keep NH Great!! NH residents and tourists must work to keep the state as pristine as possible. This is a beautiful state and tourism provides important revenue to the state and to businesses in NH. Once we open pandora's box and let big business scar our landscape there is no turning back. Please don't let "money win" this battle. Let common sense bring us to agree that we need to protect views of our mountains, lakes, and unadulterated countryside. Once it is gone, we can never get it back!!!

You've heard it all before.....but it is still important to protect our pristine countryside.

Rather than making more and more energy available, lets try to cut-back and reduce our carbon footprint..... protect our environment. Once it is gone.....we can never get it back!!!
